### This Week

 The median list price in TAMPA, FL this week is \$221,900. The 2671 properties have been on the market for an average of 131 days.

The Market Action Index has been climbing lately while days-on-market are trending down, these point to a positive near-term outlook for the market.

# Supply and Demand

 The market has not shown strong directional trends in terms of supply and demand. However, inventory is sufficiently low to keep us in the Seller's Market zone and prices have been moving upward as evidence.

Real-	Time Market Profile		Trend

### **Median Price**

 Prices hit another all time high this week. Given current conditions, prices continue to march higher. A persistent drop of the Market Action Index into the Buyer's zone will be a leading indicator of the price strength subsiding.

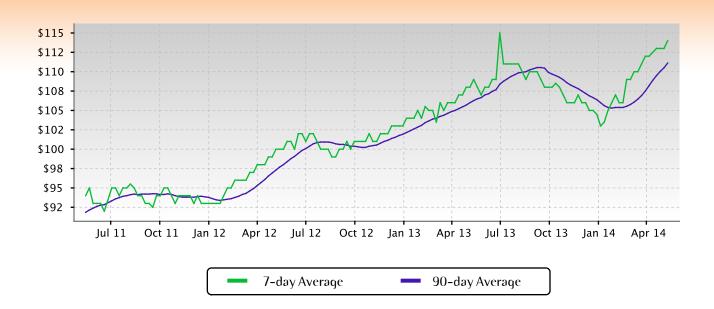

# **Quartile Prices**

Not surprisingly, given the condition of the overall market, all quartiles have shown price strength in recent weeks. All have been increasing in price lately.

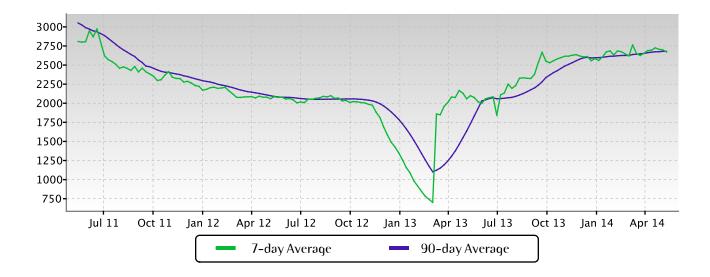

## Price per Square Foot

In a market where prices are rising fairly consistently, price per square foot is essentially flat. This often implies that new homes coming on the market are pricier, and also larger than older homes. As a result the value one can buy stays the same.

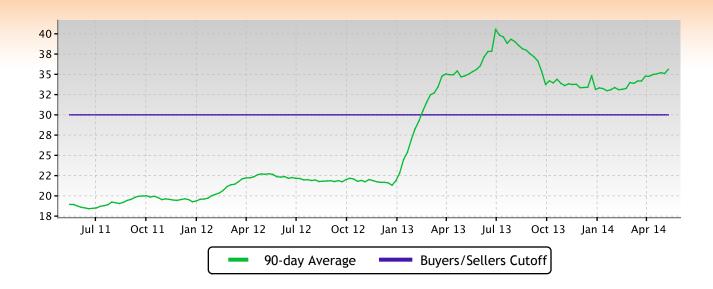

## Inventory of Properties Listed for Sale

Inventory has been relatively steady around these levels in recent weeks.

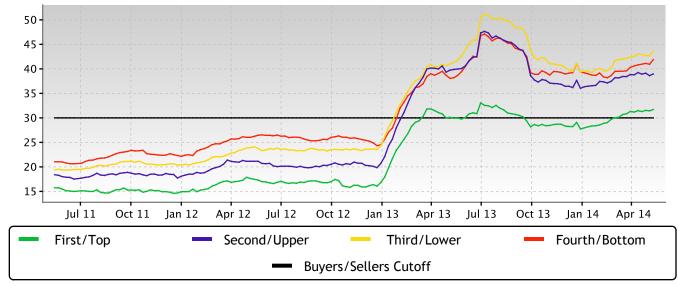

### **Market Action Index**

The TAMPA market is currently in the Seller's Advantage zone (greater than 30). The 90-day Market Action Index stands at 35.63 which indicates that demand is strong and available supply of homes gets snapped up relatively quickly.

### Market Action Index per Quartile

Not surprisingly, all segments in the market are showing high levels of demand. Watch the quartiles for changes before the whole market changes. Often one end of the market (e.g. the high-end) will weaken before the rest of the market and signal a slowdown for the whole group.

Residential house prices are a function of supply and demand, and market conditions can be characterized by analyzing those factors. Watch this index for sustained changes: if the index falls into the Buyer's Advantage zone (below 30) for a long period, prices are likely in for a downward correction.

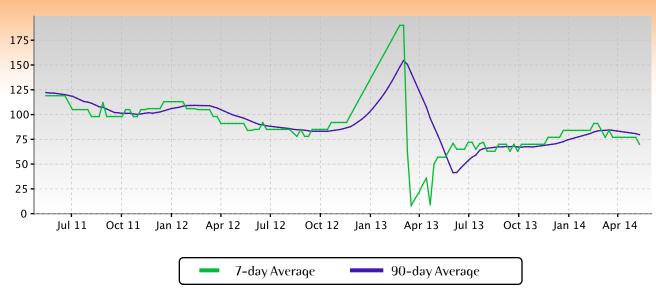

### CITY OVERVIEW

SMITH & ASSOCIATES REAL ESTATE | WWW.SMITHANDASSOCIATES.COM

### TAMPA, FL

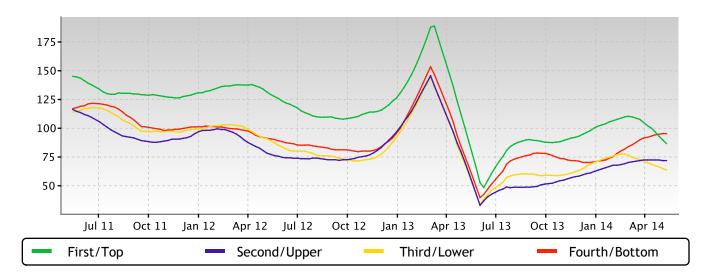

## Days on Market

The properties have been on the market for an average of 131 days. Half of the listings have come newly on the market in the past 70 or so days.

## Days on Market per Quartile

L-• It is not uncommon for the higher priced homes in an area to take longer to sell than those in the lower quartiles.

### **This Week**

 The median list price in TAMPA, FL 33610 this week is \$64,000. The 121 properties have been on the market for an average of 140 days.

The Market Action index has been trending down lately, while days-onmarket is climbing, providing mostly bearish signs for the market.

## Supply and Demand

 The market has started cooling and prices have recently plateaued.
 Since we're in the Seller's zone, watch for changes in MAI. If the MAI resumes it's climb, prices will likely follow suit. If the MAI drops consistently or falls into the Buyer's zone, watch for downward pressure on prices.

### **Median Price**

•• Prices in this zip code have been on a downward trend in the last few weeks and this week, while essentially flat, doesn't break us out of that cycle.

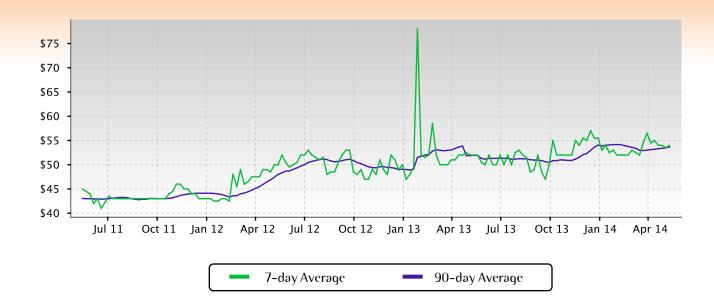

# **Quartile Prices**

In most of the quartile market segments, we see prices in this zip code have stabilized recently. Only Quartile 4 shows any price increases in the last few weeks. Often this condition happens in markets where demand has fallen (for example, due to micro-location variables) but supply is still relatively short. Buyers are focusing on the lowest price homes in the area.

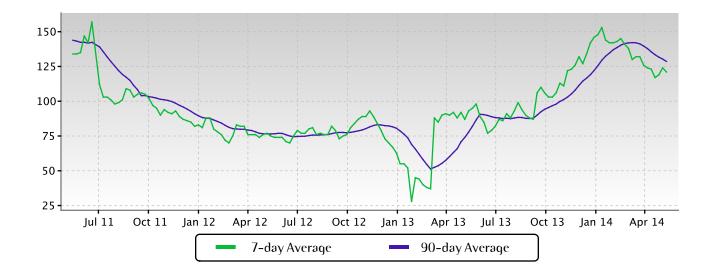

## Price per Square Foot

Despite recently falling prices, the price per square foot has stayed reasonably flat. This implies that there's a portion of the market being priced at a premium. You can investigate this condition in the quartile details.

## Inventory of Properties Listed for Sale

Inventory has been relatively steady around these levels in recent weeks.

### **Market Action Index**

The TAMPA, 33610 market is currently in the Seller's Advantage zone (greater than 30). The 90-day Market Action Index stands at 37.71 which indicates that demand is strong and available supply of homes gets snapped up relatively quickly.

### Market Action Index per Quartile

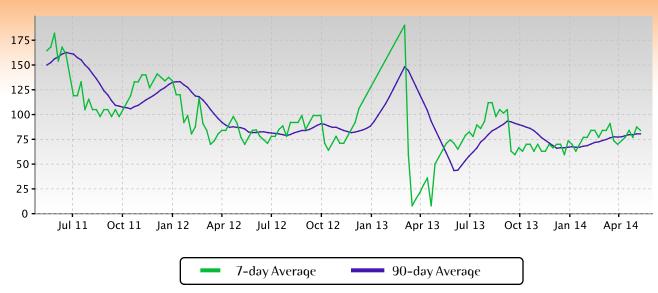

Not surprisingly, all segments in this zip code are showing high levels of demand. Watch the quartiles for changes before the whole market changes. Often one end of the market (e.g. the high-end) will weaken before the rest of the market and signal a slowdown for the whole group.

Residential house prices are a function of supply and demand, and market conditions can be characterized by analyzing those factors. Watch this index for sustained changes: if the index falls into the Buyer's Advantage zone (below 30) for a long period, prices are likely in for a downward correction.

### **Days on Market**

The properties have been on the market for an average of 140 days. Half of the listings have come newly on the market in the past 84 or so days.

## Days on Market per Quartile

L-• It is not uncommon for the higher priced homes in an area to take longer to sell than those in the lower quartiles.
