### This Week

- The median list price in TAMPA, FL this week is \$221,900. The 2671 properties have been on the market for an average of 131 days.

The Market Action Index has been climbing lately while days-on-market are trending down, these point to a positive near-term outlook for the market.

### Supply and Demand

- The market has not shown strong directional trends in terms of supply and demand. However, inventory is sufficiently low to keep us in the Seller's Market zone and prices have been moving upward as evidence.

#### Real-Time Market Profile

#### Value Statistics

Market Action Index	Seller's Advantage	35.6	↔
---------------------	--------------------	------	---

The Market Action Index answers the question "How's the Market?" by measuring the current rate of sale versus the amount of the inventory. Index above 30 implies a seller's advantage. Below 30, conditions give the advantage to the buyer.

## Median Price

Prices hit another all time high this week. Given current conditions, prices continue to march higher. A persistent drop of the Market Action Index into the Buyer's zone will be a leading indicator of the price strength subsiding.

## Quartile Prices

Not surprisingly, given the condition of the overall market, all quartiles have shown price strength in recent weeks. All have been increasing in price lately.

## Price per Square Foot

In a market where prices are rising fairly consistently, price per square foot is essentially flat. This often implies that new homes coming on the market are pricier, and also larger than older homes. As a result the value one can buy stays the same.

## Inventory of Properties Listed for Sale

Inventory has been relatively steady around these levels in recent weeks.

## Market Action Index

The TAMPA market is currently in the Seller's Advantage zone (greater than 30). The 90-day Market Action Index stands at 35.63 which indicates that demand is strong and available supply of homes gets snapped up relatively quickly.

## Market Action Index per Quartile

Not surprisingly, all segments in the market are showing high levels of demand. Watch the quartiles for changes before the whole market changes. Often one end of the market (e.g. the high-end) will weaken before the rest of the market and signal a slowdown for the whole group.

Residential house prices are a function of supply and demand, and market conditions can be characterized by analyzing those factors. Watch this index for sustained changes: if the index falls into the Buyer's Advantage zone (below 30) for a long period, prices are likely in for a downward correction.

## Days on Market

The properties have been on the market for an average of 131 days. Half of the listings have come newly on the market in the past 70 or so days.

## Days on Market per Quartile

It is not uncommon for the higher priced homes in an area to take longer to sell than those in the lower quartiles.

## This Week

- The median list price in TAMPA, FL 33626 this week is \$374,900. The 173 properties have been on the market for an average of 77 days.

With inventory trending up but days-on-market and the Market Action Index essentially flat recently, conditions do not seem to have strong up or down pull.

## Supply and Demand

- In the last few weeks the market has achieved a relative stasis point in terms of sales to inventory. However, inventory is sufficiently low to keep us in the Seller's Market zone so watch changes in the MAI. If the market heats up, prices are likely to resume an upward climb.

## Median Price

Prices in this zip code seem to be pulling gently back from its high-point. This week prices slid a notch further down. We're still near the high point of the market so we'll keep an eye on the Market Action Index to anticipate any more significant down shifts in pricing.

## Quartile Prices

In most of the quartile market segments, we see prices in this zip code have stabilized recently. Only Quartile 4 shows any price increases in the last few weeks. Often this condition happens in markets where demand has fallen (for example, due to micro-location variables) but supply is still relatively short. Buyers are focusing on the lowest price homes in the area.

## Price per Square Foot

Despite recently falling prices, the price per square foot has stayed reasonably flat. This implies that there's a portion of the market being priced at a premium. You can investigate this condition in the quartile details.

## Inventory of Properties Listed for Sale

Inventory has been climbing lately. Note that rising inventory alone does not signal a weakening market. Look to the Market Action Index and Days on Market trends to gauge whether buyer interest is keeping up with available supply.

## Market Action Index

The TAMPA, 33626 market is currently in the Seller's Advantage zone (greater than 30). The 90-day Market Action Index stands at 33.73 which indicates that demand is strong and available supply of homes gets snapped up relatively quickly.
